REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose, in a manifold closing machine with a rotating head and forming tools slidable in a radial direction, a supporting element slidable in an axial direction on a supporting frame, a double-acting actuator that is coupled to the supporting element so as to be rotatable and axial movable by a motor means wherein a body of the actuator supports coaxially and at a front part thereof the rotating head into which a stem of the actuator extends and is movable with a stroke that is controlled electronically and with the rotating head kinematically connected to the forming tools in order to impose coordinated radial movement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Ed Tolan whose telephone number is 571-272-4525.
